

You will no doubt come across sites from time-to-time that don't provide RSS feeds enabling you to keep up-to-date with latest news stories or site updates. In these instances, it is possible to create your own feeds for these websites by using web-based RSS feed-builders such as Ponyfish RSS Feed Builder.

Ponyfish is a FREE web-based tool that allows you to create your own RSS feeds from almost any web page.

All you have to do is simply point Ponyfish to the web page you want to create a feed from, then follow a few steps to setup which types of links you want to include in the feed.

Open your web browser (preferably Firefox) and go to:

<http://www.ponyfish.com/>

Register to use this service.

Click "Login"

Click "Click here to sign up".

Register your details to create an account.

Fill out the fields as required and click "Create Account" to continue.

Check your email for confirmation of your login details.

Activate your account by clicking on the link in your email and using the username and password provided.

Save this email in a folder where you will find it again in case you forget your login details

Thanks for creating a Ponyfish account.

To access your new account go to <http://www.ponyfish.com/account.php> and log in with the information below:

Email: tsheehan@govhs.org
Password: [REDACTED]

You may change your password once you log in to your account.

We hope you enjoy using Ponyfish. Please take a look at our paid plans at <http://www.ponyfish.com/pricing.html> to see how you can create more feeds and get access to additional features. If you have any questions or comments you can post at <http://www.ponyfish.com/forum/> or contact us at <http://www.ponyfish.com/contact.html>

Thanks,
The Ponyfish Team

Click to "Create Feed".

You can also reset your password from this page.

First, enter the URL of the page you want to create a feed for.

Step 1: Enter the URL of the page you want me to create an RSS feed from.

http:// **Enter the url.** Click

[Advanced options: [Set a cookie](#)]

Step 1: Enter the URL of the page you want me to create an RSS feed from.

[Advanced options: [Set a cookie](#)]

This will display the website and links on that page.

Step 2: Click on at least two links below that you want to see in your RSS feed.

The links you click on should go to articles or images that are updated on this page on a regular basis. The more you click the happier I'll be. I'll try to use the links you click on to learn how to find new links in the future.

Choose links from the site you want to develop a feed from.

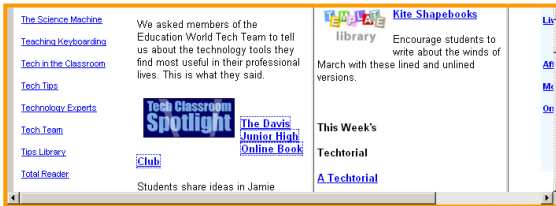

The ones you have clicked on appear below the website window.

Select as many as you can. It makes it easier to build the feed.

Click "Continue".

Step 2: Click on at least two links below that you want to see in your RSS feed.

The links you click on should go to articles or images that are updated on this page on a regular basis. The more you click the happier I'll be. I'll try to use the links you click on to learn how to find new links in the future.

Speaking of Electronic Whiteboards... - http://www.educationworld.com/a_tech/tech/tech206.shtml
The Best Tech Tools for Teachers - http://www.educationworld.com/a_tech/tech/tech234.shtml
The Davis Junior High Online Book Club - http://www.educationworld.com/a_curr/teacher_feature/teacher_feature148.shtml

Continue » Click.

You can probably skip this step if you provided a lot of links in the previous step.

However, you can click on any of the characters to add more wildcards.

Click "Continue".

[Back](#)

Step 3: Help me clean up the search term I'll use to find new links.

You can probably skip this step if you provided a lot of links in the previous step. However, you can click on any of the characters to add more wildcards.

Things to look for:

- Dates** - If each URL contains a date, make sure the year and month are wildcarded. e.g., if you see something like `/blog/2006/0*/*/`, make sure to wildcard the "2006" and the "0".
- IDs** - If each URL contains a numeric id, make sure that each digit is wildcarded. e.g., if you see something like `index.php?id=100*`, make sure to wildcard the "100".

`http://www.educationworld.com/a_tech/` Edit any characters by clicking.

Continue » Click continue. Wildcards

View the samples from the RSS feed from the site.

Edit the title or description by typing in the textboxes.

Click "Finish"

Step 4: Take a peek at what your RSS feed would contain.

If this doesn't look right, [go back](#), to make changes. You can also update your feed's title and description below.

Title: Education World @ Lesson Planning Channel **Edit Title and/or Description**

Description: Education World @ Lesson Planning Channel

- Speaking of Electronic Whiteboards... - http://www.educationworld.com/a_tech/tech/tech206.shtml

Finish » Click.

Copy and paste the url from the box to your Netvibes account.

That's it! You can copy the link from the box below to your RSS reader and start using your feed.

If you already have a Ponyfish account, [login](#) to add the feed to your account. If you don't have an account, you can [sign up now](#).

You don't need an account to use the feed, but here's why it's a good idea:

- You'll be able to make changes to this feed. Otherwise, if you'll need to tweak something down the line, you'll just have to create a new one.
- You'll have access to more of the Ponyfish features that let you customize your feed.
- Your feed won't expire as quickly if it doesn't get used. Feeds without an account will be purged after 7 days if they aren't read.
- Your feed will get updated more often. Feeds without an account get updated every 8 hours. Feeds with an account are updated every 4 hours, and our [paid](#) subscriber's feeds are updated every 1-2 hours, depending on the plan.

<http://www.ponyfish.com/feeds/84035hVEnLDot>

➡ Add this url to your Netvibes site.

» **Do it again!** If you have some more sites you want to try, [create another feed](#).
